SUMMARY

Final-year B.Tech (AI & Data Science) student at SJIT Chennai with CGPA 8.23, two internships, and five hackathon placements including three 1st-place wins. Builds production-ready ML systems — from supervised learning, EDA and feature engineering through model evaluation and REST API deployment. Seeking an AI/ML Engineer role to apply classification, data preprocessing, and model optimization skills in a product-driven environment.

TECHNICAL SKILLS

Languages: Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn), SQL (Joins, Aggregations, Subqueries)

AI / ML: Supervised Learning, Classification, Feature Engineering, Data Preprocessing, Hyperparameter Tuning, Model Evaluation (Precision, Recall, F1-score, Cross-validation), Computer Vision (OpenCV), Sensor Data Analytics

Deployment: Flask REST API, Model Deployment, Netlify, Render, Google Cloud Platform (GCP)

Web & Tools: React.js, Three.js, HTML5, CSS3, Git, GitHub, Jupyter Notebook, IoT, Embedded Controllers

PROJECTS

Phishing URL Detector | *Python · Flask · Scikit-learn · React.js · Tailwind CSS · Netlify · Render*

- Built end-to-end supervised classification pipeline — performed EDA and feature engineering on URL attributes (HTTPS, length, special-char density, IP flags, keyword presence) before model training
- Trained and evaluated a Random Forest Classifier using Scikit-learn; optimized via hyperparameter tuning and assessed using precision, recall, and F1-score (Achieved 95%+ F1-score)
- Deployed ML model via Flask REST API for real-time inference; integrated with React + TypeScript frontend — live on Netlify & Render with per-feature confidence explanations

Drone & Rover for Smart Agriculture | *Python · OpenCV · Computer Vision · IoT · Machine Learning*

- Designed a multi-class image classification system for plant disease detection — applied data preprocessing (resize, denoise, normalization) and feature extraction on drone imagery using OpenCV
- Evaluated model across crop health categories using classification metrics; iterated on model optimization to improve detection reliability in varied lighting; implemented real-time anomaly detection for intruder identification on rover hardware
- Won 1st Place at AI-ZYPHER'24 Shark Tank, SRM — selected over 30+ competing teams

Smart Helmet for Road Safety | *Python · IoT · Embedded Sensors · ML*

- Fused alcohol and fatigue sensor streams using rule-based ML classification with real-time risk scoring; processed multi-sensor data pipeline on embedded controller for sub-second alert latency
- Won 3rd Place at Sai Ram College Project Expo among 50+ teams; 1st Place at SRM Hackathon (Rs. 3,000 prize)

INTERNSHIP EXPERIENCE

Robotics & Data Intern — Zuntra Digitals

June – August 2025

- Built end-to-end data pipelines for sensor ingestion, cleaning, and preprocessing from an autonomous delivery bot using Python and Pandas — handled missing values, outliers, and sensor noise as part of data quality workflows
- Performed exploratory data analysis (EDA) on multi-sensor telemetry; engineered temporal and spatial features to improve real-time navigation decision-making and route optimization
- Delivered analytical insights and feature sets integrated into the bot's production behavioural logic, supporting autonomous decision-making

Web Development Intern — Karthikesh Robotics Pvt. Ltd.

January – February 2025

- Developed interactive 3D product showcase interfaces with React.js and Three.js; optimized frontend performance and resolved cross-browser compatibility issues
- Built dynamic, responsive web pages with HTML, CSS, and JavaScript — applied UI/UX best practices to reduce page load time through asset and rendering improvements

EDUCATION

B.Tech — Artificial Intelligence & Data Science | CGPA: 8.23 / 10

2022 – 2026

St. Joseph's Institute of Technology, Chennai | Relevant: Machine Learning, Deep Learning, Digital Image Processing, Operating Systems

David Matric Hr. Sec. School, Chennai

Higher Secondary (HSC) – 2022 | Percentage: 89.3%

Secondary School (SSLC) – 2020 | Percentage: 71%

ACHIEVEMENTS & CERTIFICATIONS

Hackathons:

- 1st Place SRM Hackathon (Fire Extinguisher Drone, Rs.3,000)
- 1st Place AI-ZYPHER'24 Shark Tank, SRM
- 2nd Place BLAZE A TRAIL 1.0, SJIT (Awarded Internship)
- 3rd Place Sai Ram College (Rs.1,500) Finalist HackIT 3.0, VIT

Certifications:

- Google Cloud Campaign — GDSC
- AWS Certified Developer — Infosys Springboard
- DevOps Engineer — One Roadmap
